

Why Eaton?

Electrical power is more than just a convenience; it's an essential element of doing business today. To deliver the competitive advantage our customers demand, Eaton helps enterprises proactively measure and manage the power system as a strategic, integrated asset throughout its lifecycle. Eaton's PowerChain Management® solutions provide the power to make a difference, helping our customers achieve their business goals while maintaining environmentally sustainable enterprises as well. Tools such as energy audits and real-time monitoring of energy consumption enable customers to manage energy resources wisely.

Products such as Eaton's state-of-the-art UPSs, variable speed drives and lighting controls help conserve energy and increase efficiency. Eaton is committed to sustainable solutions—for our customers and for ourselves.

A one-stop partner, Eaton provides UPSs, DC Power systems, award-winning power management software and world-class service offerings to render confidence that power problems will not disrupt your systems, data or critical operations.

Online UPS selector

Not sure which Eaton UPS is best for you. Our online UPS selector is a quick and easy tool to find the right UPS solution to meet your needs. www.eaton.com/powerquality.

UPSgrade™

Improve your datacenter. Upgrade your UPS.

Whether you're new to Eaton® or a longtime customer, anyone in the market for a power protection upgrade will benefit from our new UPSgrade™ program!

Designed to offer you affordable access to the industry's latest technology solutions at discount prices, the program even provides free and environmentally sound disposal of your outgrown equipment.

The Eaton UPSgrade program is simple!

- Products up to 6 kVA are available (trade-ins up to 3 kVA)
 - Eaton and MGE Office Protection Systems™, Powerware®, and Pulsar® series products
 - Standby, line-interactive and online technology
- Upgrade must be equal to a greater kVA
- Upgrade may be up to twice the kVA of original unit
- Upgrade must be equal or greater topology

Go green with UPSgrade.

Eaton provides environmentally friendly disposal and recycling of all UPS components, minimizing the amount of material that ends up in landfills. Upgrading your data center equipment to higher efficiency Eaton UPSs will also reduce heat production and utility costs.

The UPSgrade program offers over 130 skus to choose from including several of Eaton's newest UPS products!

The truth is, there's no better way to address current or future expansions to your ever-growing data center than the new Eaton UPSgrade program. To learn more, locate a reseller or contact an Eaton representative, visit us online at www.eaton.com/upsgrade.

Eaton 5130 UPS

Delivering high-density power protection for critical loads from 1250-3000 VA, the Eaton 5130 UPS offers more power in the same or smaller footprint than previous-generation equivalents, plus new performance features. The 5130 resolves outages, sags, surges, under-voltage and over-voltage conditions—and supplies clean, conditioned power to all connected equipment.

The 5130 is value-priced, but it delivers features you would normally expect to find in much higher-priced systems, such as: load segment control, hot-swappable battery modules, long battery runtime options, multiple communication options, high output power factor and high power density—all in a sleek, modern package.

Eaton 9130 UPS

A recent addition to our power management portfolio, the Eaton 9130 UPS provides superior power management, resolves utility power protection problems and supplies continuous power conditioning to all connected equipment.

Incorporating more than 40 years of UPS power supply design experience, the 9130 delivers essential power protection for IT and networking data center equipment, medical systems, manufacturing process control—or anywhere critical equipment and applications require clean, continuous power. The 9130 is available in 700-3000 VA, in both tower and rackmount configurations.

Eaton 9135 UPS

The Eaton 9135 UPS (5-6 kVA) resolves utility power quality problems to secure effective power protection for valuable equipment as it gracefully handles utility outages and delivers on-demand visibility into UPS system status from anywhere.

The 9135 delivers superior power protection for medium-density data centers, banking and security systems, manufacturing process control, retail point-of-sale systems and telecommunications/VoIP equipment. Combining superior performance with innovative features, the 9135 is the ultimate UPS in its class.
